

Nexis Fibers Twisting and Texturing Capabilities:

Twisting in Slovakia

- Type of twisting machines: Murata, Ratti, RPR, Saurer Allma, Verdol UT 60
- Heatsetting capabilities : In autoclave (vapor); in hot chambers (dried air); on twisting machines (hot plates)
- Type of materials and Range of counts : Continuous Filament yarn (Polyester, Nylon, Viscose, Acetate). From 20den to 30,000den = 22dtex to 33,000dtex.
- Twist level range : From 20 to 3,000t/m = From 0.5 to 75 tpi
- Plying capabilities : Up to 12 ply
- Capabilities includes fancy yarns like bouclé, flammé, frisé, crepe

Twisting in Latvia

- Type of twisting machines : Verdol UT-60, Roblon Tornado 300
- Heatsetting capabilities : None
- Type of materials and Range of counts : PA6 High tenacity from 840 to 100,000den = 940dtex to 110,000dtex.
- Twist level range : From 20 to 600t/m = From 0.5 to 15 tpi
- Plying capabilities : Up to 30 ply

•Air Jet Texturing in Slovakia

- Type of machines : ICBT AT8E2
- Type of materials and Range of counts : Polyester, Nylon. From 70den to 2700den = 78dtex to 3,000dtex.

Note: Package weight on agreement.
